

## PIENAAR ENERGY (PTY) LTD

# Kyrgyzstan s solar and wind power with energy storage

## Overview

---

In 2024, the country began building a 400-megawatt solar power plant and a 100-megawatt wind farm, marking significant steps toward reducing reliance on imported electricity and fossil fuels. Kyrgyzstan has begun electricity generation from its first wind power project near Issyk-Kul, a 100 MW facility backed by USD 100 million, marking a key milestone in the country's renewable energy transition. It is especially important that the project was developed by the Kyrgyz. In a significant move towards sustainable energy, Kyrgyzstan has launched a pilot project focusing on energy storage, funded by the Global Environment Facility and implemented by the UN Development Programme. This initiative is part of a broader national strategy to modernize its aging grid and. Although Kyrgyzstan has the potential to generate 142 billion kilowatt-hours (kWh) annually, current production stands at just 14 billion kWh, approximately 10% of its hydropower capacity. According to Energy Minister Taalaibek Ibrayev, the country currently generates 3,450 megawatts of. Kyrgyzstan and China have embarked on a major collaboration to enhance sustainable energy development by launching the construction of two new power plants. The announcement was made by Kundus Kyrbasheva, head of the Green Stations Association, who highlighted the.
