

**PIENAAR ENERGY (PTY) LTD**

# **Kyrgyzstan shingled solar panels**

## Overview

---

This article explores the key technological adaptations for producing solar modules that not only survive but thrive in Kyrgyzstan's unique conditions, ensuring long-term performance and a sustainable return on investment. Kyrgyzstan is taking a significant step towards enhancing its renewable energy capacity. The nation's Ministry of Energy has officially signed a landmark investment agreement with China Gezhouba Group International Engineering for the construction of a major solar power plant near the capital. Projects to establish solar panel production facilities are currently under consideration in Kyrgyzstan. This was announced at a meeting of the Jogorku Kenesh (Parliament) during a discussion on energy issues. Deputy Altynbek Kylychbaev asked whether efforts are underway to launch solar panel. On December 24, Kyrgyzstan inaugurated its first solar power plant in the Kemin district of the Chui region, approximately 100 kilometers east of the capital, Bishkek. The 100-megawatt facility was constructed with \$56 million in Chinese investment and is expected to generate approximately 210. Pilot project (Round 1): one plant with a capacity of 100 to 150 MWAC in Kongorchok, in tender stage with bids expected by end June 2025.
