

**PIENAAR ENERGY (PTY) LTD**

# **Large-scale energy storage products**

## Overview

---

The top energy storage technologies include pumped storage hydroelectricity, lithium-ion batteries, lead-acid batteries and thermal energy storage. Electrification, integrating renewables and making grids more reliable are all things the world needs. However, these can't happen without an increase. Large-scale energy storage systems are the backbone of our evolving power grid – sophisticated technologies that capture excess electricity when it's abundant and deliver it precisely when needed. When paired with solar, the duo provides the most reliable and affordable sources of power generation we can deploy right now. Leveraging AI-driven optimization, VPP integration, and intelligent energy management platforms, we deliver safe, efficient, and scalable energy storage.
