Overview

14 GW of solar capacity for self-consumption in 2025, lifting cumulative capacity to 9.3 GW, as residential and commercial installations declined while industrial and off-grid segments showed greater resilience, according to data from the Spanish Photovoltaic. Spain installed 1. Czechia's Thyssenkrupp Steel Europe AG has concluded four power purchase agreements (PPAs), securing the supply of around 230 GWh of green electricity to further decarbonise its steel production, the German company said. US renewables developer Origo Energy has obtained tax equity investment of USD 340. India is a major supplier of solar panels to the US, with 97% of its module exports, totaling 10.4 GW, destined for the US in the first nine months of 2025. Interestingly, the trade deal came weeks after the US pulled out of the International Solar Alliance, backed by India.
