

PIENAAR ENERGY (PTY) LTD

Latest photovoltaic panel cost standards

Overview

Department of Energy's latest solar cost model shows that residential solar prices are up, commercial solar is getting cheaper and utility-scale pricing remains flat. The addition of batteries increases costs by \$1.75/W for larger. Each year, the U. NLR's PV cost benchmarking work uses a bottom-up. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. 56 per watt on average, with systems ranging from \$20,000-\$30,000 before incentives. Combined with the tax credit, homeowners can achieve payback periods of just 6-10 years.
