

**PIENAAR ENERGY (PTY) LTD**

**Lesotho light-transmitting  
series bipv solar glass  
components**

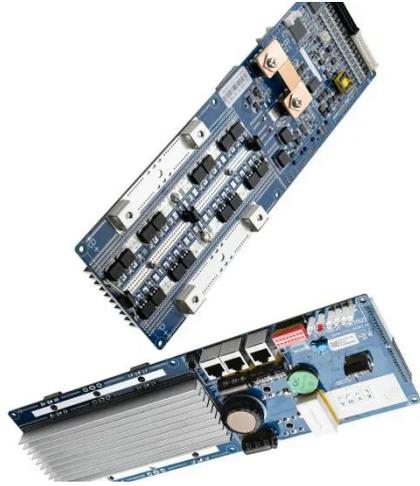

## Overview

---

This work shows the results of the simulations (in terms of thermal transmittance, solar heat gain coefficient, and visual transmittance) carried out on 3D glass elements integrated with Luminescent Solar Concentrators (LSC) and Semi-Transparent Perovskite Solar Cells. This work shows the results of the simulations (in terms of thermal transmittance, solar heat gain coefficient, and visual transmittance) carried out on 3D glass elements integrated with Luminescent Solar Concentrators (LSC) and Semi-Transparent Perovskite Solar Cells. The utility model discloses a solar BIPV (building integrated photovoltaics) light-transmitting assembly which comprises a BIPV assembly, wherein a solar cell is arranged in the BIPV assembly, the solar cell is connected with a terminal box, a side edge of the BIPV assembly is provided with a. Unlike opaque solar panels that are often added as afterthoughts, transparent BIPV modules function as both core building envelope components (e., glass curtain walls, skylights) and clean energy generators—resolving the longstanding conflict between natural light utilization, architectural. Semi-transparent dual glass modules a perfect solution, since they constitute a range of active technological glasses that have the property of generating electrical energy and can be used both in new buildings and in renovations. The architectural integration of photovoltaic modules in new. By using building envelopes with adequate insulation and transparency to let natural light and solar heat gain into the indoor environment, heating, cooling, and artificial light consumption and CO<sub>2</sub> emissions related may be reduced. All our glass products can be manufactured into insulated double-glazed units and are fully warranted and certified. Acting simultaneously as both building envelope material and electricity generator, provides savings in material and electricity costs, reduce fossil fuel use and ozone-depleting gas.

## Lesotho light-transmitting series bipv solar glass components

---

### Transparent Solar PV Glass

Polysolar manufactures a wide range of different solar BIPV glass technologies designed to best meet the application and situational needs of our clients. All our glass products can be manufactured into ...
