

**PIENAAR ENERGY (PTY) LTD**

# **Lifepo4 capacity chart**

## Overview

---

This is the complete voltage chart for LiFePO<sub>4</sub> batteries, from the individual cell to 12V, 24V, and 48V. Manufacturers are required to ship the batteries at a 30% state of charge. This comprehensive guide will demystify the LiFePO<sub>4</sub> voltage chart, explaining how to interpret voltage levels, maximize battery life, and. In this comprehensive guide, we'll delve into the specifics of LiFePO<sub>4</sub> lithium battery voltage, providing you with a clear understanding of how to interpret and utilize a LiFePO<sub>4</sub> lithium battery voltage chart. Part 4: How Does Voltage Affect LiFePO<sub>4</sub> Battery Performance?

Lithium Iron Phosphate. This chart illustrates the voltage range from fully charged to completely discharged states, helping users identify the current state of charge of their batteries. 4V (100% charging charge).
