One of the more studied manganese oxide-based cathodes is  $\text{LiMn}_2\text{O}_4$ , a cation ordered member of the spinel structural family (space group  $\text{Fd}\bar{3}m$ ). In addition to containing inexpensive materials, the three-dimensional structure of  $\text{LiMn}_2\text{O}_4$  lends itself to high rate capability by providing a well connected framework for the insertion and de-insertion of Li ions during discharge and charge of the battery. In particular, t...
