The Maldivian government has signed a landmark agreement to deploy 38 megawatt-hours (MWh) of battery energy storage systems (BESS) alongside energy management systems (EMS) across 18 residential islands, as part of its transition to renewable energy. The initiative, backed by the Asian Development Bank, is a key component of the Accelerating Renewable Energy Integration and Sustainable Energy (ARISE) project, supported by the World Bank. In March 2023, the Project Team Leader made a site visit and did a brief consultation with the implementing agency, the Ministry of Environment (ME), on the key concerns. Under the ARISE project, Maldives is seeking contractors for installation of 40 MWh capacity Battery Energy Storage Systems (BESS), across 18 electricity grids representing 19 islands/cities.
