Mali: Solar power for rural villages

Sustainable Access to Electricity For People in Rural Areas Successful Commissioning Despite Difficulties Solar Plant Achieves Full Electrification Our Partners The two Solar Power Center consist of a solar-PV system with a total output of 153 kWp and a 230 kWh battery energy storage system each, which feed into the existing mini-grids. The newly added systems will achieve cost-effective full electrification "24/7" in the villages. The connected households can therefore completely dispense with diesel generators.
