

PIENAAR ENERGY (PTY) LTD

Manufacturer of wind-solar hybrid power generation system in manchester uk

Overview

We design and manufacture a range of standard and bespoke standalone hybrid power systems for remote & off-grid environments. Our roots lie in the design of small wind turbines, precision engineered and manufactured in the UK and appreciated. Our integrated systems ensure you have a reliable power source, no matter the time of day or weather conditions. Already have solar?

We can upgrade your setup by seamlessly. We give you everything you need to build a hybrid wind and solar system. We have been in the renewable energy industry for 16 years and have a friendly, professional, and knowledgeable team. Robust, lightweight, silent power source to power demanding. Using high voltage engineering, we take projects from application to energisation, with the goal of protecting the environment. Our team of electrical engineering experts are equipped to handle projects from simple cabling installations to complete substation design and build contracts from 11 kV up. Designed for off-grid and high-consumption commercial sites, our solar and hybrid power solutions lets you slash fuel usage by up to 90% — without compromising power availability. SolGen combines solar, battery storage and a Stage V HVO generator into one compact, mobile unit.

Manufacturer of wind-solar hybrid power generation system in man

Hybrid Solar Power for UK Sites

Designed for off-grid and high-consumption commercial sites, our solar and hybrid power solutions lets you slash fuel usage by up to 90% -- without compromising power availability. SolGen combines ...
