

PIENAAR ENERGY (PTY) LTD

Mexico develops energy storage projects

Overview

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments. From pv magazine LatAm. The new rule requires solar and wind power plants to include battery systems with a capacity equivalent to 30% of their installed power, aiming to add 574 MW of storage by 2028. At the end of the article, a table provides details of each project, including capacity, location and expected commercial operation. Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to its development path. 14 billion in private investment for renewable energy projects. Meanwhile, Canadian-owned mining companies have committed to a Sustainable Mining Standard, a global framework guiding their operations in Mexico. In Mexico, this concept has taken on greater relevance.
