

PIENAAR ENERGY (PTY) LTD

Microgrid Project Development Report

Overview

This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [*Powered by PIENAAR ENERGY \(PTY\) LTD*](http://www.Booth, Samuel, James Reilly, Robert Butt, Mick Wasco, and Randy Monohan. Microgrids for Energy Resilience: A Guide to Conceptual Design and Lessons. Microgrids serve as an effective platform for integrating distributed energy resources (DERs) and achieving optimal performance in reduced costs and emissions while bolstering the resilience of the nation's electricity system. various SR technologies suitable for different microgrid applications. This deployment of the microgrid and its associated assets was initiated in the beginning of 2022 at the Pacific Northwest National Laboratory (PNNL)-Sequim. Microgrid design involves critical decisions across multiple dimensions, including load coverage (from critical-only to full load), operational duration (2 hours to indefinite), Distributed Energy Resources(DER) (various combinations of photovoltaic (PV), Battery Energy Storage System (BESS).</p></div><div data-bbox=)

Microgrid Project Development Report

Validated, Transparent, and Accessible Microgrid Valuation and

Customers, developers, utilities, and regulators across the industry can apply this tool to inform project-level decisions based on a sound technical understanding and unbiased cost-performance data.
