

PIENAAR ENERGY (PTY) LTD

Microgrid UI Control

Overview

ETAP Microgrid Control offers an integrated model-driven solution to design, simulate, optimize, test, and control microgrids with inherent capability to fine-tune the logic for maximum system resiliency and energy efficiency. NLR develops and evaluates microgrid controls at multiple time scales. Our powerMAX Power Management and Control System maximizes uptime and ensures stability, keeping the microgrid operational even under extreme. Generac Link Microgrid Controllers are purpose-built to orchestrate multiple energy assets—solar, storage, generators, and more—into a unified, efficient power system. Whether you're managing facility resilience, reducing demand charges, or enabling grid participation, these controllers provide. Simplifying the inherent complexity of a microgrid, the GridMaster Microgrid Control System easily integrates and communicates with a host of different energy assets.

Microgrid UI Control

Microgrid Control - a SICAM application

Microgrid Control - a SICAM application ensures the reliable control and monitoring of microgrids, protects an independent power supply against blackouts and balances out grid fluctuations as well ...
