Microgrid training report summary

Overview

This book provides a comprehensive survey on the available studies on control, management, and optimization strategies in AC and DC microgrids. It focuses on design of a laboratory-scale microgrid system, with a real-world. Presentation was intended to build foundational understanding of energy resilience, reliability, and microgrids. Coalition stakeholders include the City of Oakridge, South Willamette Solutions, Lane County, Oakridge Westfir Area Chamber of Commerce, Good Company/Parametrix, Oakridge Trails. Microgrids serve as an effective platform for integrating distributed energy resources (DERs) and achieving optimal performance in reduced costs and emissions while bolstering the resilience of the nation's electricity system. It can connect and disconnect from the grid to operate in grid-connected or island mode.
