

**PIENAAR ENERGY (PTY) LTD**

# **Monitoring the energy storage emergency power supply**

## Overview

---

In this guide, we'll explore what NFPA 110 is, and what to consider when implementing and maintaining your facility's emergency power system.

ABSTRACT Seamless recovery and sustained power to critical infrastructures (CIs), after grid failure, is a crucial need arising in disaster scenarios that are increasingly becoming more frequent. Accreditation standards recommend CIs to have emergency power supply system (EPSS) in order to form a. emergency and standby power systems — outlines requirements for the installation and performance of backup power systems in emergency and legally required applications, where an outage would pose a life safety risk. ACP has compiled a comprehensive list of Battery Energy Storage Safety FAQs for your convenience. Read ACP's FAQ document to learn more in detail.
