

**PIENAAR ENERGY (PTY) LTD**

# **My country s first wind turbine**

## Overview

---

Kyrgyzstan has begun electricity generation from its first wind power project near Issyk-Kul, a 100 MW facility backed by USD 100 million, marking a key milestone in the country's renewable energy transition. The announcement was made by Kundus Kyrbasheva, head of the Green Stations Association, who described. The worldwide total cumulative installed electricity generation capacity from wind power has increased rapidly since the start of the third millennium, and as of the end of 2023, it amounts to over 1000 GW. 2 The Halladay Windmill was then implemented by the Austrian engineer Josef Friedländer for the 1883 Vienna International Electrical Exhibition. The development is located in rugged mountainous areas close to the city of Gori. The Ruisi wind farm will be equipped with 33 Goldwind GW171-6.
