

**PIENAAR ENERGY (PTY) LTD**

# **Namibia flow battery factory**

## Overview

---

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader Transmission Expansion and Energy Storage (TEES) program. Funding support for TEES is being provided through the World Bank, under Loan and Grant numbers. Vanadium Redox Flow Batteries (VRFBs) offer a solution to storing excess energy and have decided advantages over other batteries. VRFBs allow you to store excess energy generated by power plants or renewable energy sources until it is needed. This article explores how the country leverages its natural resources and strategic partnerships to build a resilient energy ecosystem while addressing challenges. Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a battery installation - it's a game-changer for a country where 70% of electricity was imported pre-2023 [1]. Imagine a. By executing engineering, procurement, and construction (EPC) contracts for its inaugural large-scale battery storage project, Namibia has achieved significant strides in updating its energy infrastructure. The 54MW/54MWh Ombuu BESS project is a collaboration between the Namibia Power Corporation. Market Forecast By Type (Vanadium Redox Flow Battery, Zinc Bromine Flow Battery, Iron Flow Battery, Zinc Iron Flow Battery), By Storage (Compact, Large scale), By Application (Utilities, Commercial & Industrial, EV Charging Station) And Competitive Landscape How does 6W market outlook report help.
