

**PIENAAR ENERGY (PTY) LTD**

# **Nanadu Power s lithium batteries and energy storage**

## Overview

---

The Nanadu Power 20-foot container combines lithium-ion batteries, thermal management, and AI-driven analytics. One mining company in Australia reported a 50% reduction in diesel generator use after installing three units. It replaced diesel fuel systems as backup power (Figure 1). Here we describe a lithium-antimony-lead liquid metal battery that potentially meets the need. On June 28, Nanadu Power announced that it has signed an energy storage order with a well-known large independent power producer in India. Designed for industries ranging from manufacturing plants to solar farms, this modular energy storage system is rewriting the rules of the game between electricity demand and supply.
