National Standard for Microgrid Energy Management

Overview

NEMA launched a new guideline that establishes clear performance standards for microgrid control systems to ensure they work efficiently and reliably and promote the overall integration of renewable energy sources into power grids. The Microgrid. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.Booth, Samuel, James Reilly, Robert Butt, Mick Wasco, and Randy Monohan.
