# PIENAAR ENERGY (PTY) LTD

New energy storage in France

Overview

UK-based renewables developer Harmony Energy recently switched on its battery energy storage system (BESS) at the port of Nantes-Saint-Nazaire. It is expected to be fully operational by the end of 2025. As of 2025, the France Energy Storage Systems Market is valued at a significant scale, with projections to reach USD 22,251 million. Battery storage deployment is accelerating rapidly in Europe while significant regulatory adjustments are underway in France and the EU, making this a critical moment for companies to understand and follow the evolving legal landscape before committing to projects. With its robust nuclear backbone and ambitious green goals, the country is poised to lead Europe's energy transition. But what does the market look like today, and where. Against a backdrop of decarbonisation of energy use, electrification of mobility and growth in intermittent renewable energies, stationary electricity storage using batteries has become an essential link in the European electricity system. To support this dynamic, De Gaulle Fleurance, in.

New energy storage in France

France Energy Storage Tariff Reform: A New Blueprint for Grid

France is preparing to reshape the economics of battery energy storage with a new tariff structure designed to reward flexibility rather than penalize consumption.
