

# Niger solar Module Project

**Application scenarios of energy storage battery products**

## Overview

---

The Gorou Banda Solar Plant represents the first grid-ready renewable energy source in the country. The electricity generated at this power station will be sold to Société Nigérienne d'Electricité (Nigelec), the electricity company of Niger.

**Summary**The Gourou Banda Solar Power Station is a 50 MW (67,000 hp) under construction in . This. The solar farm sits adjacent to the existing 100 megawatts Gorou Banda Thermal Power Station, in Gorou Banda, in of the city of, the capital and largest city in the country. This is located o. As of September 2021, Niger's national generation capacity was reported as 284 megawatts, all of it derived from expensive "fossil fuels". The national electrification rate was 18.8 percent, in 2019, with the government. In September 2021, the called for pre-qualification of eligible IPPs to tender for the construction of this power station. Interested IPPs had until 22 November 2021 to apply. IFC acted as advisor to t. The construction costs were estimated at US\$70 million in 2020. Two institutions have pledged financial support. The (AFD) has agreed to lend €23.5 million and the has promised. In July 2023, it was reported that the (EPC) contractor on the first phase of the project was a comprising French companies Sogemcom and Akuo Energy. The solar f.
