

**PIENAAR ENERGY (PTY) LTD**

# **Niue Off-Grid Solar Container Hybrid**

## Overview

---

Split-phase 24 kW hybrid system with advanced MPPT tracking and seamless source switching. The container holds 20 solar panels, with capacity to integrate an additional 40-panel ground or roof array for a total of up to 60 panels (24,000W DC). As global demand for stable electricity in remote areas (islands, mining sites, bases) surges, traditional diesel generators—plagued by high fuel costs (0.40/kWh) and significant carbon emissions (over 1,000 tons of CO<sub>2</sub> annually)—are being phased out, while grid-tied systems remain constrained. 5G is the fifth generation of technology and the successor to 4G. 5G networks divide coverage areas into smaller zones called cells, enabling d. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. Avoided This power system provides energy to the administrative sector of Niue as well as a local mine site that utilises a heavy duty rock crusher. Daily load ranges from 400kW to 600kW. The solar PV plant reduces diesel fuel consumption on the island. A unique "smart" inverter in the system sends direct-current (DC) power to and from your batteries and channels alternating current (AC) between the grid and your home.

## Niue Off-Grid Solar Container Hybrid

---

### Hybrid Solar Container Power Systems

Hybrid solar container power systems are modular and containerized energy systems that combine solar photovoltaics, battery energy storage, and other power sources, such as diesel
