**48V or 51.2V**

## Overview

---

A solar power tower, also known as 'central tower' power plant or " power plant, is a type of using a tower to receive focused sunlight. It uses an array of flat, movable mirrors (called heliostats) to focus the sun's rays upon a collector tower (the target). Concentrating Solar Power (CSP) systems are seen as one viable solution for renewable, pollution-free energy.
