

**PIENAAR ENERGY (PTY) LTD**

# **Norway energy storage cabinet battery investment project**

## Overview

---

Scheduled for completion in 2026, the projects will have a combined storage capacity of nearly 40 MWh, making them among the largest battery projects in Norway to date, with a total investment framework of up to EUR 8 million. Norway is uniquely positioned to succeed with the green transition, thanks to its rich natural resources, top class industrial expertise, and the Norwegian working life model, combined with more than 100 years' experience in renewable power, electrification, world-leading offshore technology and. Most batteries being produced today will be used to store energy for wind farms, industrial activities and off-grid rural areas," explains Nora Rosenberg Grobæk, former Head of Batteries at Invest in Norway, the official investment promotion agency of Norway. Whether for EVs or energy storage. Octo- Elinor Batteries has been awarded the contract to supply battery solutions for three large-scale battery parks in Southern Norway, boosting energy storage capacity, reducing grid costs, and supporting a faster transition to a low-emission society. rethink their approaches and sourcing strategies. The battery industry will undoubtedly play an important role in limiting the effects of climate change and strengthening the energy security in Norway and Europe. Let's unpack why this initiative matters to. The project aims to enable new industries to emerge in Norway by developing competence into energy efficient battery cell production and enable a world-leading research environment within industrial battery production here in Norway. Is stationary energy storage a good idea in Norway?

Electric cars.
