

**PIENAAR ENERGY (PTY) LTD**

**Off-grid cost of mobile energy storage battery cabinets for Indian ports**

Solar

## Overview

---

The objective of this study is to assess: (a) a least-cost, operationally feasible pathway for India's electricity grid through 2032, (b) critical aspects of energy storage, including total energy storage requirement through 2032, optimal locations (co-located). The objective of this study is to assess: (a) a least-cost, operationally feasible pathway for India's electricity grid through 2032, (b) critical aspects of energy storage, including total energy storage requirement through 2032, optimal locations (co-located). Let's break down what's really moving the needle on energy storage device prices: 1. The Battery Material Tango Lithium carbonate prices have swung like a pendulum—from ₹5. But here's the kicker: Indian manufacturers are now blending locally. To support this, the Ministry of Power introduced measures like funding for battery storage projects, eased transmission policies, and incentives to boost local manufacturing. But the path forward requires clarity: Where should we deploy storage?

What's the right duration for these systems?

How do. ity to at least 500 GW by 2030. A new trend of "firm and dispatchable renewable energy (FDRE)" tenders is emerging. Key areas like marine, leather, textiles, and electronics will see duty exemptions and incentives. The budget also aims to ease personal imports and streamline trade. Recent energy storage auctions in India reveal record-low prices, with unsubsidized standalone battery storage bids at 2. Copper prices surged 50% in 2025, outperforming major indices.
