

PIENAAR ENERGY (PTY) LTD

Ottawa microgrid applications

Overview

The integrated system includes roof top solar panels, a Home Energy Management System (HEMS), a smart inverter, battery storage, air-source heat pump with thermal storage (optional), a bi-directional meter and a “critical load panel” for emergency power. From 2019 to 2020, Hydro Ottawa led a microgrid technologies trial program called MiGen Transactive Grid. To lead the way for a smart. For the electricity grid to grow and evolve it needs to move away from a traditional, centralized system to one that is supplemented by consumers and communities. Hydro Ottawa's MiGen Transactive Grid is a trial project that represents the future energy marketplace - one in which consumers generate. Microgrids play a crucial role in the transition towards a low carbon future. This not. Member of Parliament for Ottawa South, the Honourable David McGuinty, on behalf of Canada's Minister of Natural Resources, the Honourable Amarjeet Sohi, today announced a \$5 million investment to Hydro Ottawa for Phase 2 of a smart grid project at a community housing complex in Ottawa. This capability allows you to generate your own electricity on-site and use it as needed. 🌱 Improve access to funding and provide support for clean energy initiatives in Indigenous, rural and remote.

Ottawa microgrid applications

MiGen , Hydro Ottawa

To lead the way for a smart energy future, Hydro Ottawa embarked on this trial to study and understand how customers use devices relating to Solar Generation, Storage, and Home Energy Management ...
