Photographing the wind blades taking off

Overview

In this video I'll show you the tricks and techniques I use to minimise camera shake during long exposure shots. Like painting with air, photographers use tools and timing to show how wind shapes nature. The impact of wind varies – it can make grass wave, trees bend, and clouds race across the sky. To catch these moments, you need the. Mother Nature's elements can often help you out when you run out of photographic ideas, if you don't try and fight her. -Use your heaviest, sturdiest tripod. For instance, knowing the direction and strength can. Can you effectively photograph during windy conditions?

Do you put your camera away when it gets windy?

Or do you pull it out and let the windy conditions paint a picture for you?

I took the above shot on a stormy afternoon in Vestrahorn, Iceland.
