# **Photovoltaic bracket UL certification**

## Overview

---

UL 2703, the Standard for Mounting Systems, Mounting Devices, Clamping/Retention Devices, and Ground Lugs for Use with Flat-Plate Photovoltaic Modules and Panels covers mounting systems, including mounting devices, clamping devices and ground lugs for use with photovoltaic. UL 2703, the Standard for Mounting Systems, Mounting Devices, Clamping/Retention Devices, and Ground Lugs for Use with Flat-Plate Photovoltaic Modules and Panels covers mounting systems, including mounting devices, clamping devices and ground lugs for use with photovoltaic. UL certification services can help ensure proper grounding of a photovoltaic (PV) power system to support safe use. Proper grounding of a photovoltaic (PV) power system is critical to helping ensure electrical safety during its lifetime. PV equipment needs to be properly bonded, in addition to. As safety requirements and standards are enforced across the PV Industry, Intertek helps racking manufacturers remain compliant and keep up with the rapidly expanding demands of the Solar market. We have extensive experience testing and certifying racking, mounting and grounding systems for top. A key component of SMLLC's commitment to safety and quality is its rigorous adherence to UL 2703 certification standards. Administered by CSA Group, UL 2703 solar carports, shade structures, and ground mounts from Solar Mounts LLC has been evaluated and tested in grounding, bonding, and mechanical. The photovoltaic bracket certification process acts as that crucial quality checkpoint for solar mounting systems.

### Sun, Steel, and Safety: The Role of UL 2703 in Solar Racking

However, what sets Solar Mounts LLC apart is how we achieved our UL 2703 certification. Most solar racking manufacturers stop short at the minimum, testing only for grounding and/or ...
