

PIENAAR ENERGY (PTY) LTD

Photovoltaic bracket chrome plating

Overview

Commonly used plating metals include chromium, nickel and zinc. The plating layer not only provides corrosion resistance and durability, but also adds texture and aesthetics to the appearance of the bracket. Photovoltaic bracket process flow char,zincating for aluminum parts,and then copper plating. Now,if you want to go for the Show Chrome quality,after copper plating,you continue the core chemical used in the chrome plating process. We carry a wide variety of mounting systems and custom design each mounting system to order. For Unirac and ground-mount orders, please email sales@mrsolar. Each product complies. Electroplating: Electroplating is a surface treatment that deposits a layer of metal on the surface of a support.

Photovoltaic bracket chrome plating

Adjustable Photovoltaic Bracket

Find reliable photovoltaic brackets for solar panel mounting. Shop our range of durable, easy-install solutions for roof and ground systems. Perfect for solar energy.
