

## PIENAAR ENERGY (PTY) LTD

# Photovoltaic bracket inkjet printer manufacturer

50KW modular power converter

#### Flexible Configuration

- Modular Design, Expanding as Required
- Small&Light, Wall Mounted
- Installed in Parallel for Expansion

#### Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

#### Reliable Protection

- Outdoor IP65 Design
- Sufficient Protection Functions Equipped

## Overview

---

South Korea-based Gosan Tech Co., a ten-year old industrial inkjet technology company supplying patterning and coating equipment to the organic light-emitting diode (OLED) display industry, has launched a line of inkjet printers for manufacturers of perovskite solar. South Korea-based Gosan Tech Co. We have pioneered the use of. In PV cell manufacturing, inkjet printing deposits metal paste directly onto the surface of the cell through very minuscule openings of a highly efficient, parallel print head, providing a contactless, maskless printing alternative to conventional screen printing and stencil printing. This. The very latest solar panel materials could be fabricated using solution-based processing methods, making them highly amenable to printing on thin and flexible substrates. An investment by a corporate venture fund backed by Japan's Epson Group is expected to help it expand the business and widen the applications of its industrial. But in fact, at the National Renewable Energy Laboratory (NREL), scientists have been pioneers in develop-ing inkjet printer technology to produce thin-film solar modules. A major application of these modules—in which the solar absorber can be deposited on virtually any type of material and in any.
