

PIENAAR ENERGY (PTY) LTD

Photovoltaic cell board loading machine

ESS

Overview

This machine separates Solar Cells from a stack and transfers them into a cassette. When the cassette is full, it can be removed and another cassette started immediately. Our automated Solar/PV modules production line includes a complete set of equipment, such as solar.

- 200 wafer transfer from two (2) Plastic boats into one Quartz boat, back-to-back in the same slot.
- Transfer back-to-back wafers from one Quartz boat into two Plastic boats.

Includes safety sensor and safeguards to prevent wafer. In the solar panel manufacturing industry, tabber and stringer machines play a crucial role in assembling photovoltaic (PV) cells into strings and panels. Our system provides effective wafer handling with single side transfer, extremely low breakage rate and damage detection. Automation level: Integrated robotic arms, image recognition, vision alignment, linear modules, and automated soldering. Functions: Automatic string welding, string lay-up, and full cell-string connection in one system.

Photovoltaic cell board loading machine

Back to Back Wafer Transfer w/ Furnace Loading

Includes safety sensor and safeguards to prevent wafer breakage. Solar Cell Furnace Loader o Load and Unload Quartz boats onto the paddles of the Furnace. o Built to interact between Transfer Machine & ...

Ultra-High-Speed Lay-Up & Bussing Machine , 14,000 Cells/Hour

Automates string welding, lay-up, and bussing with $\pm 0.20\text{mm}$ precision. Reduces labor by 90% and boosts consistency.
