# **Photovoltaic energy storage battery production plant**

## Overview

---

Essentially, a BESS consists of battery modules that store electrical energy generated from solar panels. Sometimes two is better than one. Coupling solar energy and storage technologies is one such case. The reason: Solar energy is not always produced at the time. WEG announces the construction of a new manufacturing plant dedicated to the production of battery energy storage systems (BESS) in Itajaí, Santa Catarina. The facility will be the most advanced in the country within this segment and represents a strategic step forward in the company's portfolio of. Battery Energy Storage Systems (BESS) represent a significant advancement in the realm of renewable energy, particularly in optimizing solar power utilization. This article explores how these two technologies complement each other, offering economic, environmental, and grid management.
