

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic flexible support investment**

## Overview

---

Remember when photovoltaic investment meant slapping rigid panels on rooftops and calling it a day?

That's like using a flip phone in 2025. The global solar energy market was valued at approximately \$121.99 billion in 2024 and is projected to surpass \$389. Power generation from renewable sources, such as solar and wind, is projected to grow from its current share of about 25 percent of total US generation, to about 45 percent, by 2030. In this article, we review photovoltaic module and energy storage technologies suitable for. Fixed supports (rigid structures) and flexible supports (tensioned cable systems) are two main methods used in constructing photovoltaic power plants, and their construction technology has significant differences.

## Photovoltaic flexible support investment

---

### How Flexible Photovoltaics Are Advancing Renewable ...

FPVs are creating new opportunities to access renewable energy, whether it is incorporated into wearable technology, smart cities or off-grid homes.
