# **Photovoltaic panel battery charging upside down**

## Overview

---

Batteries are overcharging and/or have too much fluid loss. Check the high-voltage disconnect (HVD) setting and reset to the proper value. That's the opposite of how it should work. Because of this. 6. The battery seemed fine, but I have to believe that it has spent its total life up to now inverted. I saw in Will's tear down, that these batteries (at. I am re-wiring my shed system and wanted to put in a breaker between the solar charger and the battery, mostly for ease of maintenance in the future so I can shut off the charger without shutting off the inverter.
