

PIENAAR ENERGY (PTY) LTD

Photovoltaic panel bottom box glue application method

Overview

Watch workers manually mix adhesive and pot junction boxes to ensure reliable sealing on solar panels. #sungold #sungoldsolarpower #sungoldsolarpanel #solaren. The easy, no-mess application of junction boxes with die-cut 3MTM Solar Acrylic Foam Tape allows for faster fabrication and can result in a cleaner look, compared to liquid adhesives with acrylic foam, which is viscoelastic in nature. To attach the junction box to the PV panel, thread the PV ribbon through the openings in the bottom of the junction box. Make sure the junction box is properly oriented in a horizontal position before firmly placing. Sika develops bonding and sealing solutions in close cooperation with its customers in the photovoltaic industry. To Sika, this means not only developing best-in-class technology solutions to match the customer's technical and commercial requirements, but also ensuring appropriate performance. Avery Dennison offers pressure-sensitive adhesive tape solutions for a variety of solar panel bonding applications. These durable, UV-resistant solutions are easy to use and automate, and can facilitate design optimization.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

Photovoltaic panel junction box glue application process

It is important to check compatibility of all the elements of the junction box including wire, solders, solder fluxes, metals and the exterior sealant applied to adhere the junction box to the back of the solar panel.
