

PIENAAR ENERGY (PTY) LTD

Photovoltaic panel loading electric lift

Overview

This innovative tool enables you to lift solar modules to the roof with ease and precision, making installation faster, safer, and more efficient. With its compact design and simple operation, Module Lift is ideal for both residential and commercial solar installations. The device uses your existing fiberglass Werner or Louisville extension ladder. A pulley system is attached to the top of the ladder. You streamline rooftop installs with compact lifts that reduce manual strain and speed staging. Typical units feature 24 V DC or 220 V motors, 150–800 kg load ratings, anti-slip panel cradles, overload protection, and IP65. The TranzVolt is a battery powered, solar panel hoist, which allows for the vertical lift of modules to the rooftop. This is an excellent option for projects located in remote, off grid, or new construction areas where power is not readily accessible.

Photovoltaic panel loading electric lift

Solar Panel Lift

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.
