The solar panel operates at optimum performance with MPPT solar controller. The MPPT Solar Controller is vital to the performance of the solar panels. This controller takes the solar panel power (voltage and current) and converts it to the optimum mix to charge the battery. It effectively works as a battery charger and not a power supply. It takes See more on safiery energy.gov[PDF]

Solar PV Post-Evaluation Checklist - Energy.gov

Actual performance should be within about 5% of expected STC power. This procedure includes system nameplate rating (kW), solar irradiance measurement (W/m²) and module cell temperature (C). ...
