

## PIENAAR ENERGY (PTY) LTD

# Photovoltaic panel sector investment

## Utility-Scale ESS solutions

## Overview

---

Nearly 250 GWdc of solar will be installed from 2025-2030, but the sector has more potential. Despite the changing market and policy conditions that the solar industry has faced this year, solar will remain the dominant power source added to the grid in the next five years. The solar industry encompasses all activities related to the generation, distribution, and utilization of solar energy. It includes the manufacturing and implementation of the following key components: Grid Integration and Smart Technology: Systems and software that help integrate solar power into. In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2. The rest of the world was up 11% y/y. It will take trillions of. The photovoltaic industry is transforming energy production, driving sustainability, and improving energy independence. 7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history.

- LiFePO<sub>4</sub>**
- Wide temp: -20°C to 55°C**
- Easy to expand**
- Floor mount&wall mount**
- Intelligent BMS**
- Cycle Life:≥6000**
- Warranty :10 years**

### Spring 2025 Solar Industry Update

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...
