

PIENAAR ENERGY (PTY) LTD

Photovoltaic panels DJI drones

Overview

DJI Enterprise drones help energy companies through efficient inspection of solar panels, wind turbines, power lines, etc. Read about our solutions and case studies. It enables precise detection of solar panel defects, sediment buildup, or damage through its. AeroClean A30 makes solar panel cleaning easier and more efficient than ever! Designed for industrial drones like the DJI FC30, the AeroClean A30 is perfect for maintaining photovoltaic panels at high altitudes. With its advanced features and seamless DJI integration, it ensures thorough and safe. The current market offers drones and drone software specifically designed to capture professional-grade thermal data and aerial images of solar assets. In addition to being able to clearly view temperature anomalies on a crisp thermal image, the Zenmuse XT can be used to scan installed solar panels during normal operation.
