

PIENAAR ENERGY (PTY) LTD

Poverty alleviation rural solar power generation

Overview

Agri-voltaics or Agri-PV allows for dual land use - enabling farmers to generate electricity from solar energy while supporting agricultural production that increases productivity and incomes, and reduces rural poverty. The photovoltaic poverty alleviation project, part of the “Ten Major Precise Poverty Alleviation Projects” implemented by the Poverty Alleviation Office of the State Council, significantly contributes to eradicating poverty and rural revitalization. A difference-in-differences model was utilized in. Solar energy holds significant potential for alleviating poverty, tackling climate change and providing affordable clean energy, contributing to multiple United Nations Sustainable Development Goals.

Poverty alleviation rural solar power generation

Solar photovoltaic interventions have reduced rural poverty in China

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions.
