# **Power Grid Safety Micro Classroom**

## Overview

---

Students use the model to develop explanations for how microgrids help keep the lights on in communities during power outages and explore some of the characteristics of microgrids that allow for integration with small-scale renewable energy sources. Learning objectives: Energy is Everything's 9-12th grade workshop, Teach Your Students to Become Smart-Energy Managers on Campus, covers the United States' energy system, energy resilience, and transition toward decentralized energy generation. With this, educators can design a classroom experience that encourages. LEAPS offers over 300 hours of training in microgrid and grid modernization topics. Training is available online, as concept-based lessons in a classroom setting, and hands-on through interactive simulators and physical hardware at ASU or through extension education. The Microgrid Mastermind Educational Guide bridges the gap between gameplay and real-world energy systems.
