

## **PIENAAR ENERGY (PTY) LTD**

# **Powerful energy storage system meets the standards**

## Overview

---

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States. — The United States is the epicenter of global AI research and development, and the hyperscale data centers powering our dominance are consuming vast amounts of electricity. and the performance-based. Under the 2025 Energy Code, a battery energy storage system is defined as stationary equipment that receives electrical energy and then uses batteries to store that energy for later use to supply electrical energy when needed. BESS consists of one or more modules, a power conditioning system, and. Sandia National Laboratories is a multimission laboratory managed and operated by National Technology & Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International Inc. Battery energy storage systems (BESS) store energy.
