

PIENAAR ENERGY (PTY) LTD

Procurement contract for waterproof pv distributions for urban lighting

Overview

The enclosed technical template language is intended to provide only example language for agencies to consider in the process of assembling a solicitation and ultimately a contract for privately financed on site solar photovoltaic (PV) systems. A working understanding of contract development best practices and access to standardized solar contract templates and request for proposals (RFPs) will help reduce the time and cost associated with this process by improving project transparency and accountability while accelerating solar. This document has been published with the support of Andy Walker, Otto VanGeet, Tom Harris and Chandra Shah of the National Renewable Energy Laboratory (NREL). The table below summarizes key team members or areas of expertise that may be needed. Solar energy, as a renewable resource, offers a dependable, cost-effective, and environmentally sustainable solution. Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector. The Project Company needs only to turn a key to start. The City of Detroit Office of Contracting and Procurement (OCP) on behalf of the Public Lighting Department requests proposals from qualified Respondents to render certain technical or professional services ("Services") as set forth in this RFP to provide Locally-Sited Utility Scale Solar.
