

PIENAAR ENERGY (PTY) LTD

Ps20 solar power tower

Overview

The world's largest solar power tower recently began operating outside Seville, Spain -- and it marks a historic moment in the saga of renewable energy. The solar tower PS20, next to its smaller sister PS10, produced even more power than expected over the course of its trial. The PS20 solar power plant (PS20) solar power plant is a solar thermal energy plant in Sanlucar la Mayor near Seville in Andalusia, Spain. The 20 megawatt (MW) solar. This page provides information on Planta Solar 20 - PS20 CSP project, a concentrating solar power (CSP) project, with data organized by background, participants, and power plant configuration. Though they look like portals to another dimension, they serve a much more practical purpose: They are the “power towers” of Solucar, the largest solar energy complex in Europe. The engineering design was created by MicroStation and OpenPlant. Credit: Quintanilla / Shutterstock. PS10 has produces electricity for 5,500 houses.

Ps20 solar power tower

PS20 solar power plant

The PS20 solar power plant (PS20) solar power plant is a solar thermal energy plant in Sanlucar la Mayor near Seville in Andalusia, Spain. It was the world's most powerful solar power tower until the Ivanpah Solar Power Facility in California became operational in 2014. The 20 megawatt (MW) solar power tower produces electricity with large movable mirrors called heliostats.
