

PIENAAR ENERGY (PTY) LTD

Renting factory buildings to others to install solar power generation

Overview

Conversion of factory buildings to solar power involves a systematic approach that encompasses several key steps. Selecting appropriate solar technologies is critical, focusing on panel types and. Prime Candidates: Buildings with 30,000 square feet or more of available roof space are ideal for solar installations. Act Now: Attractive solar programs are available with no upfront costs. Over the past few years, more and more businesses have realised the potential to harness free renewable energy simply by adding. Installing and owning solar facilities requires a steep upfront capital investment, operating costs, and time and effort. With a solar lease from OYA Renewables, you receive an additional revenue stream from the under utilized space on your property but with none of the responsibility or risk. How. Are you a business owner who leases your building and don't think you can do anything about getting solar and the benefits it brings?

Short-term leases: Businesses are less likely to invest in solar if their lease is uncertain or short-term.
