

PIENAAR ENERGY (PTY) LTD

Romania Energy Storage Project Planning

Overview

Privately held MASS Group Holding plans to invest more than €1 billion (~\$1.18 billion) in large-scale battery energy storage projects in Romania after reaching an agreement with the Romanian government, Reuters reported on Wednesday. The projects are intended to support Romania's power grid as Romania expects its overall energy storage to amount to at least 2. These ambitious energy storage targets are aligned with transmission. Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid. "In total, at the end of next year we should have storage capacities of at least 2,500 MW, and by 2026 we should exceed 5,000 MW.
