

PIENAAR ENERGY (PTY) LTD

Romanian phase change energy storage products

Overview

Romania enters 2026 with renewed momentum across its solar and energy-storage markets — but also with a sharper sense of discipline. The era of inflated pipelines and speculative grid bookings is fading; the market is maturing, and investors now demand a cleaner, more bankable. Romania is in the second stage of energy development, with an estimated battery storage requirement for utility-scale projects of approximately 2-4 GW by 2030. According to the authorities, this capacity is essential to ensure grid flexibility and integration of the large volumes of renewable. Aurora Energy Research foresees double digit internal rates of return for standalone battery energy storage (BESS) projects entering the market as early as 2026, while co-located assets could prove even more promising – especially post 2028 where rising saturation in the balancing markets is. In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. Power, Hidroelectrica, Engie and more big names. As global efforts intensify to combat climate change by transitioning to renewable energy sources, the role of. Romania, located in the north-eastern part of Europe's Balkan Peninsula, is expected to be one of the fastest-growing countries in Europe's new energy market, thanks to its rich natural resources and optimising policy environment.
