

**PIENAAR ENERGY (PTY) LTD**

# **Romanian photovoltaic folding container bidirectional charging**

## Overview

---

This project is located in Romania, providing local customers with an integrated, movable solar-storage power solution. It supports integration with the grid. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and mobile operation. The system consists of four 10-foot 46KW foldable photovoltaic containers and five grid-connected 100KW/215KWh energy storage systems. It supports integration with the grid. While traditional fixed photovoltaic systems are widely used, an innovative device that is "quickly deployable" is quietly emerging to meet the increasing demand for temporary power needs in emergency, outdoor, and remote locations: the retractable photovoltaic. How can bidirectional charging/discharging a battery achieve maximum PV power utilization?

In addition, with the proposed strategies, the bidirectional charging/discharging capability of the battery is able to achieve the maximum PV power utilization. All the proposed strategies can be realized by the Bidirectional Charging project, which began in May 2019, aimed to develop an intelligent bidirectional charging management system and associated EV components to optimize the EV flexibility and storage capacity of the energy system.

 **TAX FREE**    

**ENERGY STORAGE SYSTEM**

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW/115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

### Bidirectional charging of photovoltaic folding containers for highways

4 FAQs about [Bidirectional charging of photovoltaic folding containers for highways] How can bidirectional charging/discharging a battery achieve maximum PV power utilization? In addition, with ...
