

**PIENAAR ENERGY (PTY) LTD**

# **Saint Lucia Centralized Chemical Energy Storage Project**

## Overview

---

Backed by St Lucia Electricity Services (LUCELEC), the initiative will be developed on a 70-acre site on the island's southwest coast. Once complete, the system will connect to LUCELEC's 66 kV transmission grid, reinforcing local grid stability while increasing renewable energy. In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project—a 10 MW photovoltaic installation paired with a 26 MWh lithium-ion battery energy storage system (BESS). The project, set to be tendered later this year, is featured in St. Lucia's Energy Report Card (ERC) for 2021. A part of the construction on its first commercial-scale project. The RESDP is a four-year Government of Saint Lucia initiative being implemented by the Department of Infrastructure. In Saint Lucia, there are several initiatives related to photovoltaic battery energy storage: The National Utilities Regulatory Commission (NURC) is working on developing up to six.
